VISUAL EDITOR

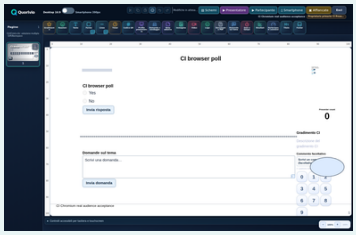

OPEN SOURCE

QUORIVIO

Interactive presentations, quizzes and audience engagement

From designing slides to receiving live answers: one environment to prepare, rehearse and run events with participants on smartphones or desktops.

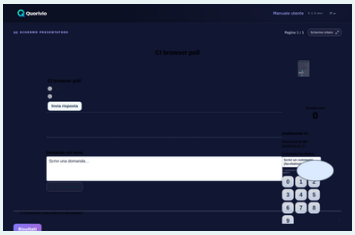

Create

Pages, widgets, masters and previews with advanced formatting.

Engage

QR and session codes; polls, quizzes and open questions.

Understand

Results, charts and feedback during the presentation.

From classrooms to conferences: let your audience take p

Presenters, participants and administrators have dedicated views. Deploy on infrastructure you manage, with authorised access and auditing tools.

LIVE SESSIONS

Environmental photos and some mockups are synthetic illustrations. UI screenshots are genuine captures from an archived test build and may differ.

FROM IDEA TO LIVE EVENT

Quorivio • 0.1.0-dev • RC293

1. Create a session
2. Design pages and masters
3. Rehearse all previews
4. Go live and collect answers

FEATURES THAT MAKE A DIFFERENCE

1 Content and interaction

Text, images, video, QR, title/footer, timers, single/multiple choice quizzes, open questions and ratings.

EDITOR • WIDGET

2 Results and control

Bar/pie charts, word clouds, connected participant counts and R-based correct-answer highlighting.

LIVE • REPORT

3 Portability

Portable .quo session bundle with content, media and calendar; local import creates a new session.

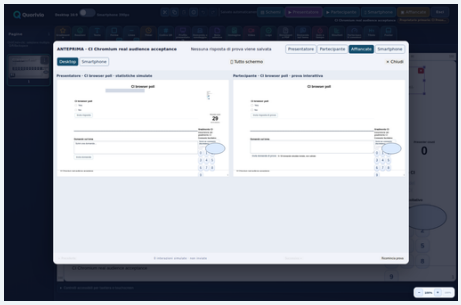

SESSION .quo

4 Administration

Users and roles, LDAP/SSO, ClamAV, backups, restore, audit, scaling and documented DR workflows.

SECURITY • OPS

AUTHENTIC UI · ARCHIVED TEST BUILD

INFRASTRUCTURE AND GOVERNANCE

- Linux server, Docker, Podman and Kubernetes
- PostgreSQL 18; NGINX or HAProxy ingress
- GDPR-oriented privacy tools; no automatic certification
